The Autorité is reforming, on the basis of existing legislation, its procedure for processing business secrets during investigations

Published on January 14, 2025

The aim of the reform is to reduce the processing time of business secrets through:

- rigorous application by the parties of the concept of business secrets;

- a reduction in multiple decisions on the treatment of business secrets. The aim is to adopt, in principle, a single decision by party concerned, granting, partially refusing or completely refusing protection and, where applicable, a single decision lifting such protection.

REFORM OF BUSINESS SECRETS

The Autorité is reforming, on the basis of existing legislation, its procedure for processing business secrets during investigations
