Health facilities: green light to the acquisition of Hexagone Santé Méditerranée by Elsan subject to commitments

Published on February 28, 2020

After a broad consultation of operators in the sector (market tests, survey of private practitioners, hearings), the Autorité has identified three main risks of harm to competition in the markets for healthcare and the provision of infrastructure for private practitioners.

To address the competition concerns, Elsan submitted a mixed commitment proposal, which includes structural and behavioural components, which make it possible to address the competition concerns while preserving the efficiency gains for patients linked to the consolidation of the Clinique Kennedy's activities at HSM's sites in Nîmes.
