

# The Autorité publishes a study on professional bodies

Published on January 27, 2021

---

To mark new provisions coming into force that expose professional bodies to heavier and more dissuasive sanctions, and as part of an approach aimed at promoting compliance, the *Autorité* has dedicated a study to the application of competition law to these stakeholders.

The *Autorité* has decided to support this change by dedicating a study to professional bodies. Drawing on decision-making practice and case law, the aim is to analyse all behaviours that may be opposed to competition law and to present alongside them the pro-competitive actions that can be taken by professional bodies.

## PRESS RELEASE OF 27 JANUARY 2021

The Autorité de la concurrence publishes a study  
on professional bodies
