For the first time, the Autorité de la concurrence is studying the markets for electric vehicle charging stations

Published on October 01, 2021

The *Autorité* has cleared the creation of the GMOB joint venture by AGI, EDF PEI, Genak and SAFO. It will be active in the sector of public charging stations for electric vehicles in Guadeloupe and, in a second phase, in Martinique and French Guiana.

On this occasion, the *Autorité* examined for the first time the upstream market for the supply of electric vehicle charging points and the downstream market for the installation and operation of electric vehicle charging points.
