Announcement and Pre-Order Timing

Apple officially announced (alongside iPhone 17 Pro and other models) on September 9, 2025. On that same day, Apple revealed the release plan and availability timeline for their latest lineup.

Pre-orders in the USA — and many other countries — started on Friday, September 12, 2025 at 5 a.m. Pacific Time. That's the moment when interested customers could place their order online or through carriers to secure a device.

Official Release Date — When iPhone 17 Pro Max Becomes Available

The official release date, meaning when orders start shipping and stock appears in stores, was set for Friday, September 19, 2025. That date marks the first wave of deliveries to customers who pre-ordered, and the first time the iPhone 17 Pro Max became physically available in U.S. stores.

So for U.S. buyers: pre-orders — September 12; official release / deliveries — September 19. If you are reading this after that date, the iPhone 17 Pro Max is already on sale in the States.

Pricing, Configurations and Where to Buy

At launch, iPhone 17 Pro Max is offered with a range of storage options: 256 GB, 512 GB, 1 TB — and for the first time, even a 2 TB version.

The starting price in the U.S. for iPhone 17 Pro Max was announced at US\$ 1,199 (for the base storage model).

You can buy it directly from Apple's online store, physical Apple Stores, or through major U.S. carriers that offer pricing plans and carrier-based deals. When ordering, you can pick unlocked models (direct from Apple) or carrier-locked plans depending on your preference.

Why Release Timing Matters — Demand, Stock, and Heat of Launch

As with previous iPhone launches, the first few weeks after release tend to be the busiest. High demand often means early shipments sell out quickly, and certain configurations (like high storage or rare colors) can run out. For iPhone 17 Pro Max, the initial pre-order and release schedule is a strong signal: Apple expected big demand.

If you didn't pre-order on September 12, you might still find stock in Apple Stores or carriers — but availability could be limited, especially right away. It's a good idea to check online and in-store periodically if you want to secure the device

without long waits.
