Initial Preparations for Printer Wireless 👉1- 855- 737- 0477) Setup

Canon printers are high-technology printers by using which you can wirelessly print from your Android, iPad, Mac, 👉1- 855- 737- 0477) Windows Computer, etc. But for enabling its printing functions, you need to perform "Canon Printer Wireless Setup". The process is simple 👉1- 855- 737- 0477) and quick but before you start configuring your printer wirelessly, go through the points provided below.

First, you need to assemble your 👉1- 855- 737- 0477) printer. The initial preparation includes unwrapping of your 👉1- 855- 737- 0477) printer and all its

hardware parts. Fit all the ink cartridges 👉1- 855- 737- 0477) properly into its place and load the printer tray with papers. Also, check the power LED lights once you turn it on.

To develop a wireless network 👉1- 855- 737- 0477) connection, you must know your network name and password. To find the credentials, check the label on the backside of your wireless router and look under the "Default Wireless Settings" heading. But if your router does not have any label, locate the credentials on the documentation provided with your router.

Also, for Canon printer wireless setup on computer, make sure you have installed the printer driver. It helps your computer in coordinating with the printer and hence allows you to personalize all the print settings.

Further, if you want to set up your printer wirelessly on your smartphone, tablet iPad, etc, you need to install the Canon Print application. The app is specifically designed for all the Canon printer users who want to print directly from their mobile.
