## How iPhone 17 Colors Compare to Previous Models

Apple has consistently evolved the color palette for its iPhones over the years. Looking back, the colors for the iPhone 17 are an interesting mix of continuity and innovation. For example, Midnight Black and Starlight White were popular choices for the iPhone 14 and iPhone 15, so it's no surprise that they've returned for the iPhone 17. However, Apple has also introduced new shades like Blue Horizon, Crimson Red, Golden Sunrise, and Emerald Green, which offer a

refreshing change.

One of the most significant differences this year is the introduction of the “Emerald Green” color, which stands out as a bold new choice. It is not only a fresh addition but also reflects the growing trend of deep, earthy tones that are making a comeback in the tech world. Blue Horizon is another noteworthy new shade that follows in the footsteps of other successful blue hues Apple has introduced in the past, such as Pacific Blue and Sierra Blue, but with a slightly different tone.
