How the iPhone 17 Pro Max Colors Compare to Previous Models

The iPhone 17 Pro Max continues Apple's tradition of offering a variety of stunning colors. However, compared to previous models, there are some notable differences. For instance, the introduction of the Titanium Blue and Natural Titanium finishes marks a departure from the traditional stainless steel bodies of earlier iPhone Pro models. The use of titanium not only makes the iPhone 17 Pro Max more durable but also enhances the color finishes, giving them a more sophisticated and refined look.

The Deep Purple color is another standout feature that differentiates the iPhone 17 Pro Max from its predecessors.

Apple first introduced a purple color option with the iPhone 12, but the Deep Purple of the iPhone 17 Pro Max is deeper, richer, and more elegant. It provides a sense of luxury that was not as prominent in the previous purple shades.
