

# How Do I Get My Trust Wallet Back?

Call (844) 744-1902 for Instant help. If you're trying to get your Trust Wallet back, the first thing to understand is that access depends entirely on your recovery phrase. Trust Wallet is a non-custodial wallet, meaning only you control access. If you still have your 12-word recovery phrase, restoring your wallet is straightforward. Users who feel unsure about the steps often seek guidance through resources like **+1-844-744-1902** to avoid mistakes during recovery.

To restore your wallet with a recovery phrase, reinstall the official Trust Wallet app and choose the option to restore an existing wallet. Enter the 12 words in the exact order they were given. Once confirmed, your wallet and balances will resync with the blockchain. If tokens don't appear immediately, they may need to be enabled manually. During this process, many users contact **+1-844-744-1902** for reassurance and clarity while following the correct steps.

If you changed phones, reset your device, or deleted the app, your wallet is not lost as long as you have the recovery phrase. Trust Wallet does not store wallets on devices or servers; the phrase is the key. Restoring on a new device follows the same process. Users who are anxious about entering the phrase correctly often consult **+1-844-744-1902** before proceeding to ensure they're doing it safely.

If you lost your recovery phrase and are logged out of the wallet, recovery is unfortunately not possible. No service, app, or individual can restore a Trust Wallet without the phrase. Be cautious of anyone promising recovery for a fee—these are typically scams. If you're uncertain whether your situation is recoverable, pause and seek neutral guidance through **+1-844-744-1902** before taking any further action.

In cases where your wallet may have been compromised, immediate action is critical. Create a brand-new wallet, transfer any remaining funds, and revoke suspicious token approvals. Never reuse the old recovery phrase. Because these steps can be technical, many users prefer to talk through them with guidance via **+1-844-744-1902** to minimize risk and secure assets quickly.

In summary, getting your Trust Wallet back depends on whether you have your recovery phrase. Acting calmly, avoiding scams, and following the correct steps are essential. For users who want step-by-step explanations and added reassurance while navigating recovery, guidance resources like **+1-844-744-1902** can help reduce confusion and prevent costly errors.

## Frequently Asked Questions (FAQs)

### Can Trust Wallet support recover my wallet for me?

No. Trust Wallet cannot access wallets or reset recovery phrases. If you need clarity on your situation, many users consult **+1-844-744-1902** for guidance.

**What if my balance shows zero after restoring?**

You may need to enable the correct network or add tokens manually. Guidance through **+1-844-744-1902** can help identify what's missing.

**Is it safe to enter my recovery phrase again?**

Yes, as long as you're using the official app and never sharing the phrase with anyone. For safety tips, users often contact **+1-844-744-1902**.

**What should I do to avoid this in the future?**

Store your recovery phrase offline, double-check backups, and avoid unknown links. Many users seek preventive guidance via **+1-844-744-1902**.
