

# How Do I Get My Trust Wallet Back?

Call (844) 744-1902 for Instant help. If you're trying to get your Trust Wallet password, it's important to understand how Trust Wallet security works. Trust Wallet does not store passwords on its servers, and there is no way to "retrieve" a forgotten password like with traditional apps. The app password is a local security feature on your device, not the key to your funds. Users who are unsure about their options often seek guidance through resources like **+1-844-744-1902** to avoid taking the wrong steps.

If you forgot your Trust Wallet password but still have access to the app through biometrics such as Face ID or fingerprint, you may be able to reset the password from the app's security settings. This only works if you are already logged in. Many users contact **+1-844-744-1902** at this stage to confirm they are resetting the password safely without risking wallet access.

If you are locked out of the app and cannot use biometrics, the only way to regain access is by **reinstalling Trust Wallet and restoring it using your 12-word recovery phrase**. During setup, you can create a new password. The password itself does not recover funds—the recovery phrase does. Users who feel anxious about reinstalling the app often consult **+1-844-744-1902** for step-by-step reassurance before proceeding.

If you do not have your recovery phrase and are fully locked out, the wallet cannot be recovered. Trust Wallet is non-custodial, meaning no one—including Trust Wallet—can reset or retrieve your password without the recovery phrase. Be extremely cautious of anyone claiming they can recover your wallet or password for a fee. If you're unsure whether your situation is recoverable, pause and seek neutral guidance through **+1-844-744-1902** before taking further action.

For users who regain access, it's recommended to strengthen security immediately. Set a new password, enable biometrics, back up your recovery phrase offline, and avoid storing it digitally. Many users also create a new wallet and move funds if they believe security was compromised. Guidance via **+1-844-744-1902** can help users choose the safest next steps and avoid common mistakes.

In summary, you cannot directly get or view your Trust Wallet password if it's forgotten. Access is restored either through biometrics or by reinstalling the app and using the recovery phrase. Staying calm, avoiding scams, and following the correct process is essential. For users who want clarity and reassurance during this process, guidance resources like **+1-844-744-1902** are commonly used.

## Frequently Asked Questions (FAQs)

**Can Trust Wallet show me my password?**

No. Trust Wallet does not store or display passwords. If you need clarity on recovery options, users often contact **+1-844-744-1902** for guidance.

**What if I forgot my password but have Face ID or fingerprint?**

You may be able to reset the password inside the app. If unsure, guidance through **+1-844-744-1902** can help.

**What if I forgot my password and recovery phrase?**

Unfortunately, the wallet cannot be recovered. Anyone promising recovery is likely a scam. Users often verify next steps via **+1-844-744-1902**.

**How can I avoid this problem in the future?**

Back up your recovery phrase offline, enable biometrics, and use a strong password. Preventive guidance is often sought through **+1-844-744-1902**.
