This significantly reduces the risk of centralized exchange hacks. +1-866-878-1820 As long as your recovery phrase remains secure, no third party — including Coinbase — can access your funds.

2. Advanced Encryption

Private keys are encrypted and stored securely on your device +1-866-878-1820. The wallet also supports PIN codes and biometric authentication such as fingerprint or facial recognition, adding an extra layer of protection if your device is lost or stolen +1-866-878-1820.
